

Unit 34 North PRIVATE LAND Elk -Booking Packet

Thanks for booking with Compass West Outfitters. We are honored that you are trusting us with what we hope will be one of many great hunts with us. We hope you are as excited about this hunting season as we are!

Call or text Chris on his cell at 505-860-3197 or call our office at 505-801-7500 anytime you have a question. Our email address is info@compasswestoutfitters.com if you prefer to email us. Our home and mailing address is:

Compass West Outfitters, LLC
PO Box 123
Pinon, NM 88344

*Please note, this is our office, **not** necessarily the location closest to your hunt when looking at driving directions/airports. Driving directions to your camp will be located on our website at www.compasswestoutfitters.com under the forms tab.

Please **always leave a name and a phone number in your message** as we don't always have your personal information with us. We are very good about returning phone calls, but please remember that during hunting season we are in very remote areas and may only be able to retrieve our messages every couple of days as many of the areas we hunt still lack cell phone service. **Please call the office in hunting season first!**

The following is information we hope you find useful when preparing for your hunt:

Deposits: Your deposit is due and price is valid within 14 days of booking. We accept checks, cashier's check or money order. **Checks can be made payable to "Compass West Outfitters, LLC".**

Cancelation policy: Your deposit is refunded (less a handling fee of 15% of the total cost) only if you can fill your spot with a new hunter at full price. Otherwise, refund may reflect handling fee + discounts/commissions to booking agents to sell the hunt. **No-shows will be charged the full amount. No-shows will be charged the full amount. We HIGHLY recommend our hunters carry trip insurance.** You can consult with your insurance agent to learn how to obtain trip insurance. You can also check out this link <https://globalrescue.com/compasswestoutfitters/index.html>

All disputes over billing will be handled by the San Juan County court in New Mexico between March 1st and August 15th.

Final Payments: **Final payment is due no later than 60 days before your hunt date.** If you are less than 60 days out please call us to arrange your payment. If you have a balance due when you arrive in New Mexico, the final payment **MUST BE PAID IN CASH BEFORE YOU HUNT.** **Checks will not be accepted in camp.**

Included in Package Price: Private land authorization (this is not a license, license must

still be purchased from NMG&F). Bow hunts are 7 days guided hunting (1X1 or 2X1). Rifle/muzzleloader hunt packages are 5 days guided hunting (1x1 or 2x1), Meals and lodging are included.

Not Included in Package Price: Travel to/from hunt camp. New Mexico license fee, habitat and HMAV stamps and NM sales tax. Tips for guide and cooks/camp-helper, meat processing, meat storage or shipping of cape or meat. Taxidermy or alcohol are also not included.

We will help you handle your trophy in the field and can help you get in touch with local meat processors/taxidermy shops as well as transport meat to closest butcher for you.

Many times the closest liquor store to camp could be 2+hours for anything other than basic whiskey and beer.

Air Travel:

For **Unit 34 north private land hunts** you will want to fly into El Paso, TX (3.5 hours) or possibly Albuquerque (5 hours, but a greater selection of flight times).

Gratuity:

It is customary to tip your guides based on your overall experience. For the cooks and camp-helper/packer, Cooks \$100-200 per week per person is common, a packer that gets you animal for you I would recommend \$100 unless you really wanted to pack out all that meat! For guides \$700-1000+, is customary, but again, please base your tip on your experience. The cost of scouting, quality gear is increasing every year, this is where the guides recoup money they spent looking for your dream bull or buck. Gratuity should not reflect number of days in the field or harvest, but rather the experience you enjoyed.

Minimum size requirements for bull elk: I don't charge a trophy fee on these ranches, I hope everyone kills a 350+! However, in order to maintain the quality of animals that we take on our ranches in NM we need to address minimum size desire. We will not allow the killing of young bulls on this hunt. It must be a mature bull, 280 plus, a huge 5X, a non-typical or cull.

This is not a meat hunt. You did not book a meat hunt! If you just want to just kill an elk please look at cow hunts (\$2500) or Chama, Colorado or even draw hunts in New Mexico...not this ranch. You booked this hunt for a solid what we hope is a high harvest and trophy potential hunt, not for meat. I am looking to maintain a 280-300+ elk average on these ranches.

Our Wounded Animal Policy on UNIT 34 North Private Land Hunts

A wounded animal is an animal that has been hit by a bullet or arrow. Blood drawn ends hunting.

Should you wound an animal, you and your guide will cease hunting, and will spend the remainder of your hunt looking for that wounded animal. You will not be allowed to harvest any other animal other than your wounded one.

Gun policy: Guns need to have a clear chamber at all times (including vehicle travel). Your guide will let you know when to chamber your weapon in the field.

Empty chamber applies to night as well. Should you have a gun chambered in camp you will be asked to leave at once, no refunds will be given. We prefer all guns to be left in the guide's truck or your vehicle in camp.

Accidental discharge of a weapon AT ANY TIME will result in you leaving camp immediately. No questions asked. Your hunt is over. No refunds will be given.

Drug/alcohol policy: It is unlawful in NM to hunt while under the influence of alcohol or other intoxicants, including medical/recreational marijuana.

Cell Phones:

There is some CELL PHONE reception at cabin. There is some cell phone reception on the 34 North ranch.

Drinking Water: we will not have bottled water in camps, but we always have clean safe drinking water in camps that you can use to fill your refillable bottle. If you must drink bottled water please bring some to camp. You will want to pack drinking bottles to re-fill in camp and bring with you to the field.

After Hours Emergencies:

For emergencies, our best number to call is the office number **505-801-7500**. Karin mans the office during the hunting season while Chris is in the field. Should you find yourself lost on your way at night or your family need to get in touch with you, you can call this number and she will do her best to get in touch with Chris, your guide, or the camp manager.

Camp Locations and Meeting Locations: Driving directions to your camp or cabin will be located on our website at www.compasswestoutfitters under the forms tab. You will not need a 4x4 to access any of our camps.

Unit 34 north hunters: We will post driving directions to the Unit 34 north cabin on our website, **DO NOT USE A GPS to find camp** - you will be taken terrible routes ***do NOT take 506** for any reason on way from El Paso to the cabin in 34 north!!

Hunting License – ***Closer to your hunt date we will email detailed step-by-step directions to walk you through the following process.***

****Mandatory Harvest Report after your hunt**** – the state of NM requires ALL hunters to fill out their mandatory harvest report whether you were successful or not. You will want to log on to your NM Game and Fish account after the hunt to complete this step. If you

don't complete this step you will not be eligible for the NM draw next year. You can also call NM Game and Fish at (888) 248-6866 to complete your harvest report over the phone.

If you have any questions, please **do not hesitate** to call us any time: **505-801-7500 (office) or 505-860-3197 (Chris' cell phone)**

E-mail us at: info@compasswestoutfitters.com

HOW TO PREPARE FOR YOUR HUNT:

GET IN SHAPE AND PRACTICE WITH YOUR WEAPON! – You WILL get out of a hunt what you put in to it ahead of time!

You will be hunting at an elevation of at about 6800'-8500 or higher. Many of you are coming from 500' or less and you're not used to the thin air like we are. Do what you can to help get your lungs ready! Even just walking for an hour a day will benefit you. Use a backpack with sand or other weight in it when you walk to get ready. If you can ride a bike or stair stepper you're going to be happy you did!

It's your hunt - guides will let you set the pace, but they will push you as they want to see you have a successful hunt. For what you are paying per day, spend some time getting ready! YOU are the one that will pay for it with a sub-par hunt, blistered feet and a crappy time overall if you don't shoot on sticks and get some exercise before you get here. Anything you can do to get ready is going to help you. There is nothing more depressing than seeing that big buck/bull on day 3 and having to run as fast as you can up a steep hill and just not having the energy to do it.

Your Ideal Hunt: Rain is the determining factor to the trophy quality of EVERY hunt we offer in New Mexico. I have killed 290 average elk in a unit that the year before we killed a 340 average. Precipitation levels in the spring (March- June) will dictate the horn growth of the animal we are hunting.

Please be sure to talk with your guide about the quality of animal that you're looking for. In the field, your guide can help advise you as to the quality of animals you are seeing, but remember that ultimately you make the call as whether or not you shoot or don't shoot. We want you to harvest the largest animals possible, but every animal you let walk is a risk of not tagging out. Remember that opportunities are not unlimited on fair chase hunts.

Please talk with Chris or the office if you feel that we have made a bad call on your guide assignment. I've been in the outfitting biz for 25+ years and do a good job at lining out people, MOST of the time. Please privately make us aware if you feel I was wrong.

We are aggressive hunters, but on these ranch hunts you will need to remember that you WILL have down time in camp during the day. No need to just jump and push all

the elk off the ranch! You will have an AM and a PM hunt with elk activity dictating the amount of field time. You will not hunt all day on this hunt.

Bow Hunters Information:

Please plan on shooting **fixed blade broad heads**. In the last 12 years we have recovered one animal shot with expandable blades. Yes, one! If you need help PLEASE call us anytime to talk more about ideas for fixed blades that shoot like expendables. Slicktrick 4 blade 100g, Exodus 125g and Whack'em 125g. We have had BAD luck with the Montec G5's - they are dull we all hate them!!!

We also request that hunters **DO NOT** use single pin adjustable sights. They are very popular in the whitetail world now, however in the world of ELK hunting they **will** hurt your odds of harvest a great deal. You will NOT have the time to set the yardage on the sight when you are calling in elk since you never know where they are coming from. We like boss hog or Black gold 7 pin sites 30-80 yard pins and you will have no reason not to get the shot you want! Just spend a little time shooting instinctively at ranges from 0-30 yds. Spend some time shooting from various positions. Shoot from knees, leaning over, around things, over things, under branches.

Please also shoot a little heavier arrow than you do for whitetail deer, we like a 500g set up for elk. We also ask that hunters learn to shoot with your quivers attached to your bows. A Primos bow sling will be your best friend on this hunt. I would be sure to pack one!!!

ELK BOW HUNTERS: I would strongly advise that you pre-treat your outer gear with permethrin you'll be glad you did. (chiggers)

Call us anytime about bow or gear questions, we are ALL bow hunters in camp!

Rifle Hunters: PLEASE learn to shoot standing on sticks. You are going to be standing 75% of the time on shots here. It's not something you should do for the first time once here. Cross canyon or over brush is almost always the way you are going to get a shot. We try for sitting shots whenever we can, but prone will almost never happen because of the terrain we hunt.

Once you have your rifle ZERO AT 200 YDS start practicing shooting off sticks. Most of the guides like and will carry the BogPod tripod with the red foam grips. Primos also makes a nice trigger stick TRIPOD that is super easy to use and easy to find Death Grip from bog pod is great to. **Or get some other cheap off brand to practice, as you don't have to bring them with you**, guides will carry their own. But please, for the good of your hunt, get ready to use sticks and shoot a bunch before the hunt starts. You'll be glad you did!

Zero your rifle at 200, and be ready for 100-400 yard shots. Most shots will be 100-400, but learn to shoot at 300-400+ and you'll be happy you did! On rifle elk hunts you really need to be solid at 300-400+ yards.

Take a shooting class, anything you can to get ready. Every year I hear that you can't

shoot over 300 yards where you live, but just google long range shooting in your area and USE WHAT YOU FIND. You might have to join a club or travel 1-2-3-4 hours to do so. Well you are traveling 1000 plus miles and spending a great deal of money to visit us, it's a small investment to be READY.

When practicing 300+ shots we never shoot paper, what we like to do when practicing long distances (300+ yards) is to shoot at balloons. It gives instant feedback, and if you're popping a balloon that is the same size as the kill zone on an elk, guess what - you're killing any elk you are shooting at! It build confidence at longer range! Don't discourage yourself shooting and evaluating paper.

If you are shooting MOA, please KNOW AND UNDERSTAND your gun, **have a chart on your stock** for the elevation and yardage the guide will tell you. I will not deal with another year of phone apps and in the field madness. UNDERSTAND YOUR GEAR or do what I would do, and get a turret with yardage so your guide can help! Why add a step to a stressful situation, JUST CLICK IT IN!

Please bring a 300 or better rifle. I know 6.5, 30.06, 308, 270, 280 will all kill elk, but you will not be taking all the shots you could with these rifles. They don't shoot long well. As a rule they are the guns we leave the greatest number of elk in the woods lost with.

We also sell all the Huskamaw long range gear AND RIFLES! If you want a custom 300win (\$4500) let us know and I can get one to you before your hunt all dialed in for our elevation. I also sell all the Huskamaw ammo and long range shooting supplies.

New Mexico Unit 34 North Elk Hunt Packing List

- **Hunting License (make sure you have all the required stamps)**
- **Rifle w/ 2-3 full boxes of Ammo, scope, scope cover**
- **Bow + 3 dozen arrows, extra release**
